

Starting the Puppet Lab on Docker:

```
docker run --rm -dit --expose 8140 --name puppet --hostname puppet --network ansible_nw
sreeharshav/puppetmaster:nocasetup
docker run --rm -dit --name puppetagent1 --hostname puppetagent1 --network ansible_nw
sreeharshav/puppetagent:V2
docker run --rm -dit --name puppetagent2 --hostname puppetagent2 --network ansible_nw
sreeharshav/puppetagent:V2
docker run --rm -dit --name puppetagent3 --hostname puppetagent3 --network ansible_nw
sreeharshav/puppetagent:V2
docker run --rm -dit --name puppetagent4 --hostname puppetagent4 --network ansible_nw
sreeharshav/puppetagent:V2
```

Puppet Agent Testing

```
#!/bin/bash
echo "Running on puppetagent1"
docker exec -it puppetagent1 puppet agent -t
echo "Running on puppetagent2"
docker exec -it puppetagent2 puppet agent -t
echo "Running on puppetagent3"
docker exec -it puppetagent3 puppet agent -t
echo "Running on puppetagent4"
docker exec -it puppetagent4 puppet agent -t
echo "AGENT RUNNING COMPLETED"
```
